Forecast for Thursday 02 Nov 2023

Weather: Mostly cloudy with outbreaks of rain, heavy and persistent at times. The heaviest rain likely across the north and east of the park with some drier conditions in the west and southwest. Windy and chilly over the summits with early gales possible.

Chance of cloud-free hill tops above 800m: 30%, most likely across the Mid Western and South Western Fells.

Low cloud and visibility: Extensive, base 300 to 600m, but lifting and breaking near or above the summits at times over the Mid Western and South Western Fells. Moderate or poor in rain and very poor at times at height, although good in any drier spell in the southwest.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Early gales possible with gusts 50 to 60mph over the summits.

Forecast for Friday 03 Nov 2023

Weather: Still rather cloudy with occasional rain, but some drier and brighter spells too. Much of the rain should die out overnight and early morning with just the odd showers. The best of the brightness across the east and southeast of the park.

Maximum wind: Northwest 25mph gusts 35 to 40mph making it feel chilly at height.

Chance of cloud-free hill tops above 800m: 50%, most likely across the Eastern, Far Eastern and South Eastern Fells in the afternoon.

Low cloud and visibility: Occasional or extensive, base 500 to 700m, lifting and breaking near or above the summits in the south and east of the park in the afternoon.

Temperature: **Valleys:** Plus 6 to 11 Celsius
At 800m: Plus 2 to 4 Celsius
Freezing level: Above the summits.

Saturday	Rain should stay to the south, giving a mainly dry and bright day, although the odd shower possible. Light or moderate east or northeast winds at height.
Sunday	Bright spells and showers, the showers turning wintry over the summits. Feeling cold with a significant wind chill, strong to gale force west or northwest winds at height.
Monday	Bright spells and showers, these wintry over the summits. Feeling cold with a significant wind chill, strong to gale force westerly winds at height. Freezing level around 800m later in the day.
